whisky have been sent out of the country this year. The very large proportion of this is Kentucky whisky, while the remainder is sent in the form of alcohol. This will be about double the quantity of spirits exported last year. The large proportion of that which has gone abroad this year has gone from Newport News. After being shipped across to the Bermudas, where it is now held in warehonses, it will probably be permitted to lie there some years until a profitable market is found for it, perhaps in the United States, perhaps abroad. Of course the market for this clase of whisky has been very crowded this year, and will be for two or three years to come. The quantity of Bourbon whisky made in Kentucky during the past year has, however, been comparatively small, and will not run more than 4,000,000 gallons. Some of the Kentucky distillers who have been able to do so have remodeled their distilleries, and are now manufacturing "high wines," for which they find a more ready sale. The quantity of whisky made in this country in the year just ended, will probably reach 75,000,000 gallons. The exact figures have not yet been received from all parts of the country. The quantity during the past few months has averaged about 7,000,000 gallons per month, but earlier in the season was not so great. Should the total run as high as the above estimate, it would be about equal to the quantity manufactured last year, though considerably less than in former years; in 1881 having run as high as 117,000,000 gallons. The quantity of grain used in the production of spirits during the past year will be shown to be nearly 20,000,000 bushels, of which the bulk, of course, is corn, very little rye or other material being used. The "high-wine" distillers of the country don't seem to have been much disturbed by the failure of Congress to relieve the Bourbon distillers by extending the bonded period. nated by acclamation, and a yell went up that bulged the roof of the court-room. Sheriff Cannon was reported sick in bed but was pledged by Mr. Patterson. FOR TRUSTRE. Col. George Gantt said: "The pleasing

duty has devolved upon me to nominate a candidate for trustee—an office which has been well filled by the Democrata of the county. Two years ago a man was nominated for that important office and elected. Andrew J. Harris in the last twenty Andrew J. Harris in the last twenty months has handled over \$1,000,000 of the people's money, and with a strong light lately thrown upon his office nothing has been found wrong." He moved that Andrew J. Harris be renominated. The nomination was seconded by Mr. J. M. Cruse in a rousing speech in behalf of the country. He was made the nominee by a unanimous vote, and Mr. Harris, being called upon, pledged his warm support to the ticket from top to bottom, and deafening calls were made for Yerger. Quiet was restored, and there was a hot debate on a motion to adjourn to the Exposition building. A vote was taken by wards and districts to adjourn until 2 o'clock at the Exposition building, and carried by a vote of 119 to 70.

seconded the nomination. He said: "It is with feelings of profound pleasure that I arise to second the nomination of the patriot of Democracy. When the enemies of Orville Yerger and detractors of his fair name and exalted reputation as a lawyer assail him unjustly, I am the one to defend. He comes from a walk on these binffs for forty years without a stain and without a slur upon his character. And yet, during that forty years his most rancorous enemy cannot point to a dark spot in his record. For four out of that forty years he was absent fighting in the thick of the battle for his country. He comes from a family of natural born lawyers, whose name and whose fame, as has been said, lends luster to the history of two States. When I know these facts, gentlemen, it makes me mad with enthuseasm for him. He stands, at least, on a plane as high as those who worship the devil all the week.

He then asked it he should read the call
made upon his candidate, and there were
gries of "Yes" and "No" and a second of Attorney-General Turner then moved to nominate Addison H. Douglass by ac-clamation. The motion was amended to cries of "Yes" and "No" and a scene of confusion.

"I shall I ad it, gentlemen, though hell should gape and the heavens fall." After reading the call he said: "He comes not as the candidate of a ring of two or three bosses, but he comes before you and asks your suffrage as Orville Yerger, and not as the candidate of a clique, and the editors of those papers that denounce him are guilty of ten thousand times worse. I want every man to have a fair and impartial showing."

It is a fair and impartial showing. The motion was amended to take the vote taken by wards and districts, but failed.

Mr. He E. Douglass moved to adjourn until 9 o'clock this morning, but the motion was lost and the thirteenth ballot was taken.

Who were the gamblers by whom

Who were the gamblers by whom it was said I was solicited? They were men like B. Lowenstein & Bros., Menken Bros , Vaccaro, Gwynne, and a host of others such as these. Why was this hue and cry made against me? It was because I sometimes indulge in a game that has been a source of pleasure and enjoyment to thousands, and is today to thousands who hide it when I did not become I pleasure I was denot. Because I played poker I was de-nounced by a miserable whelp, whose insuits I cannot and dare not resent, be-cause I cannot sink myself to his level. Should the old man who has just been proposed be nominated I will work for him as I would for myself."

MR. GEORGE B. PETERS
said: "A great many things have been said which I know to be pure fabrication. I have never been a candidate for this position, but I have said I would serve if chosen by the people of the county. I have not asked a single man to vote for me, and have not attempted to strengthen my own cause. So far as any man knows me, he knows I have not been responsible for any of the many bitter things that have been said. The judge of the Criminal Court acts under the solemnity of an oath, and there is no man on t is floor who would ask a candidate to pledge MR. GEORGE B. PETERS an oath, and there is no man on t is floor who would ask a candidate to pledge himself to trample upon the law. There are matters with respect to which the judge of the Criminal Court should exercise discretion. We point with pride to the administration of Judge Horrigan, and while every man would do well to have a mind of his own, he would not be far wrong if he followed his illustrious example. There has been a suggestions example.

It has been made to me. I am for the Democracy and no people's ticket, and for the nominations which shall be made here noved that the vote be taken by wards

and districts and the vote announced by the c airman as polled. Mr. Hunter moved to amend, and each delegate cast his vote as his name was called.

The contest was now narrowed down to Yerger and Peters, with a deadlock in prospect.
Second Ballot.—Yerger 98, Peters 86, At 2 o'clock the convention was called to order at the Exposition building, and on motion J. J. Williams, W. S. Pope and W. H. Joyce were appointed tellers, and nominations for judge of the Criminal Court were declared in order.

The object of the company is to realize, with the Pan-Electric Company, its most admirable idea, i. e., to introduce inventions already made, and to develop vast fields of electric discovery through the united effort tas the original pamphlet expressed it) "of learned Electricians and skallful Reckanics," for the payment of whom company stock will be seld, having its value based, not only on the new systems, but also "on the future possibilities of electricity," and on valuable properties already belonging to the Company.

"The Rogers Telegraph and Telephone Company," has secured the right to operate in the State of Pennsylvania, with her hundred towns and cities. "The Pan-hlectric Telephone," with a guarantee from the Parent Company to defend infringement suits, should any arise against it.

Itis telephone has been introduced into New York by parties representing several million dollars, who give forty per cent. of their local stock and \$10 per annum royalty on each instrument to the Parent Company. Missouri and Texas have contracted to give the same, with \$20,000 cash hours, and from the various States stready sold over \$2,000,000 in money and local stock has been secured since January. The Pan-Electric Telegraph, under the judicious management of Gen. Jesch E. Johnston, presideat, and Senator Isham G. Harris, vice-president, aided by an able directory, has also steadily increased the value of its stock in the value of its stock must, independent of its own value, increase in value, as the Pan-Electric stock and other properties belonging to it advance; and although the State of Pennsylvania might seem, at first view, to circumscribe its territory, its dividend, in point of fact, must arise from every State in the Union in which the "Pan-Electric and although the State of Pennsylvania might seem, at first view, to circumscribe its territory, its dividend, in point of fact, must arise from every State in the Union in which the "Pan-Electric Telephone Company," nor would it be extravagant to predict that invent

Washington, D. C., January 5, 1884.

Dear Sir.—In reply to your question propounded in the note here's attached, I beg to say; I have given the subject referred to much attention, and hare closely examined several opinions delivered by different courts in controveries between the Beil Telephone Company, Dolbe r. Spencer Ghegan, and others, and I am clearly of opinion that the Pan-Electric, named by you, in no wise infringes the Bell Telephone From the earliest decisions of our courts to the present, although inventions may in their general principles be alike, yet if in their operation and working there is an essential or material difference, there is no conflict to amount to an infringement. This is recognized in the hi-toric case of C Reilly vs. Norse, 15 How., U.S. Reps., 62, and in numerous decisions since that; but more clearly, and with more direct application to the matter now in hand, in Clough vs. Manufacturing Company, 106 U.S. Reps., 178 (October term United States Supreme Court, 1883.)

Without attempting any minute detail touching the inventions in question, I am satisfied thoroughly so—that the difference between them is wider and more distinct than that recognized by the court in the case 166 U.S. Reps., Sup. 4.

The courts hold that a "Substantial departure" from a former invention is patentable without intringing. (Duff vs. Stering Pump Co., 107 U.S. Reps. 365.)

This, in my judgment, is more than eneugh to insure the Pan-Electric Telephone from any charge of infringement of the Bell Telephone. Very truly, etc., A H. GARLAND.

B. E. Myres, Esq., National Hotel, City. enabled me to discard the use of my crutches and attend to business. I had previously used all well recommended medicines without re-lief. It has been over two months since using It B. B , and I consider myself a permanently J. P. DAVIS, Atlanta, Ga., (West End). M. A. Abbey, of Russellville, Ark., dated June 8, 1884: "At last I have found an hon-est remedy. B. B. B. is the best Blood Poison remedy on earth, and if I had a voice that preclaim its virtue. I have used only four Blood Poison.' J. M. Ellis, Atlanta, Ga., writes: "I have had a severe form of Eczema TEN YEARS, and have failed to secure relief from various doctors and about 140 bottles of a noted blood the use of B. B. B. has effected a cure, and I refer to C. P. Swift, Dr. D. O. C. Henry, Dr. F. F. Taber, Atlanta."
W. M. Cheshire, at W. A. Brotherton's store, Atlanta, writes: "I have had a large eating ulcer on my leg cured by the use of B. B. B. Senator Harris, another eminent lawyer of the Senate of the United States, has also giver the subject profound investigation from Reiss's original invention of the Telephone, in Germany, down to Drawbaugh's, Bell's and Rogers's teproduction of it in America; and hoartily concurs with Judge Garland.

The judges of the Supreme Court of Pennsylvania have lately denied an injunction to the Bell Company on their broad claims; and the most eminent jurists throughout the country agree with them in the above opinion.

Thus guaranteed against infringement suits, and having secured right in these marvelous instruments, and owning the various properties described above, 'The Rogers Telegraph and Telephone Company,' incorporated under the laws of the State of New York, April 21, 184, was capitalized at \$5,000,000, divided into shares of \$100 each.

It is possible that the Telephone stock alone—to say nothing of "the future possibilities of Electricity," may, like that of the Bell Company, which was capitalized at \$10,000,000, rise to very high prices; but for the sake of rapid construction, and to develop the rich mines of electrical discovery already in sight, the company offers to investors and speculators very rare opportunities—for holders of this stock hold, in effect, tharts of It is decidedly a most wonderful medicine for the cure of blood diseases, and it will please Mr. R.
